## **D-LEV FIRST EDITION**

◇ CONGRATULATIONS ON YOUR NEW D-LEV THEREMIN ◇

*This limited-edition instrument marks an unlikely moment in electronic music history: the birth of the (mostly) Digital Theremin. After more than a century spent confounding musicians and baffling audiences, the instrument invented in 1920 has finally evolved to circa 1990's technology.*

*Your D-Lev represents the past, present, and uncertain future of Theremin design. Named as a tribute to the great Leon Theremin himself, this instrument offers exceptionally adjustable and linear fields, an incredibly responsive tuner, true pitch correction, and the highest quality sound available, while maintaining none of the aesthetic beauty of professional instruments that came before it.*

*Each D-Lev Theremin is lovingly and uniquely handcrafted by skilled artisans within the dank D-Lev factory basement confines, located in beautiful Boonton, New Jersey. This instrument has been developed with input from Thereminists the world over, and built with whatever materials we could get our hands on at the moment, given the massive COVID induced supply chain breakdowns and international trade wars.*

*Thank you for being a part of this project. We hope that your new D-Lev Theremin brings you a modicum of joy, and a brief respite from this otherwise mundane existence.*

**Eric D. Wallin**

Chief Engineer & Janitor, D-Lev World Industries  
Boonton, NJ
